

POST PROCEDURE INFORMATION

GENERAL INFORMATION

Permanent makeup is a process.

Your makeup will be very vibrant for the first few days. You can expect the makeup to fade up to 30% by the end of the healing process. The healed results will not appear until about on or about day 28. By following your aftercare diligently you will maximize your retention and have a more even healed result.

Hang in there! Give it the full 28 days to know what your results will be!

- Do not rub, pick or scratch as this can cause scarring and uneven pigment distribution.
- Avoid sleeping on your face
- Sleep with head slightly elevated to reduce swelling
- Avoid pools, hot tubs and the like for 2 weeks.
- Avoid direct sun exposure and tanning for 4 weeks post procedure. Wear a brimmed hat and sunscreen.
- Immediately contact your health provider if there is any sign of infection
- Follow your specific aftercare instructions for the best results!

LIPS

- ❖ If you're taking a cold sore medication, continue with it as prescribed.
- ❖ Ice lips as needed for comfort.
- ❖ Day 3-5 lips will begin to exfoliate, chapped
- ❖ Use the aftercare ointment as needed. Gently wipe off excess ointment before reapplying. Failure to do so can trap bacteria.
- ❖ If you see peeling skin "hanging", do not pick! Gently cut it off with a sterile scissors.
- ❖ Day 7-10 the color will appear to have completely faded. THIS IS NORMAL. The color will fully bloom at day 28

EYELINER

- ❖ Do not touch, rub or scratch your eyes. This could cause corneal abrasion and/or introduce bacteria to eye causing infection.
- ❖ Whenever using eye drops or ointment, wash your hands well with an antibacterial soap.
- ❖ Use ice as needed for comfort
- ❖ Use ointment as needed for comfort. Apply with a clean cotton swab, use clean swab for each application
- ❖ NO EYEMAKEUP FOR 72 Hours
- ❖ NO CONTACT LENSES FOR 72 Hours.
- ❖ Avoid Latisse or any lash enhancement products. Do not resume until 4 weeks past your touch up appointment
- ❖ Discard your old mascara as mascara hold a lot of bacteria. Wash out all make-up brushes.
- ❖ CONTACT YOUR HEALTH PROVIDER IF THERE IS ANY SIGN OF INFECTION.

POWDERED EYEBROWS

- ❖ Blot brow area for the remainder of the treatment day. Continue blotting every hour or so.
- ❖ Day 2 - provided no more blotting is necessary, begin using the ointment provided. Use a cotton swab and THINLY apply 3-4 time daily. Wipe off the excess ointment before replying.
- ❖ Avoid Retinols on the forehead for 2 weeks.

MICROBLADE EYEBROWS

- ❖ Four hours post procedure; gently wipe off the brow area with sterile water cleaning any lymph, blood or oil.
- ❖ ***For oily skin, repeat above procedure the first night and the following morning post procedure.
- ❖ ***For oily skin, use a cotton pad with Witch Hazel AROUND the brow area beginning day 2 through the entire healing process to control excess oil.

Dry, Dry, Dry.

- ❖ Keep your face dry above your eyelashes for 10 days. This is very important. The brow strokes are very delicate. When makeup, dirt, water, sweat, oil and the like get in the strokes, it can cause poor and/or uneven retention.
- ❖ Avoid workouts where you'll sweat.
- ❖ When washing your hair, tip your head back and place a dry washcloth over your brows.
- ❖ Day 10 - begin to use ointment. Use a small amount 2 times a day.
- ❖ No Botox, chemical peels, facials, skin needling, microdermabrasion or the like for 4 weeks.
